-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Since new claim 35 is linked with claims 20-25, claims 20-25 is examined together with claims 35. The preview request for election/restriction is withdrawn.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For at least claims 1, 20, 26 and 35, the limitations of “a joining unit that causes at least one network printer to join a (predetermined) multicast address” in which “a predetermined multicast address” or “a multicast address” raises claimed limitations is indefinite failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention;

“print data” does not clarify where it comes from and how the printer control device gets that print data.

4. Claims 1, 20, 26 and 35 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements and method steps, such omission amounting to a gap between the elements. See MPEP § 2172.01.

Art Unit: 2625

- a. The omitted elements and steps are: the conditions or reasons why a control unit and methods for “controlling transmission of packets to”, “waiting for packets from”, and “retransmission of packets”; and
- b. The omitted elements and steps are how to have “ a print data”.

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 20 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

If a network **printer** only comprises a structure having a network interface and a multicast joining unit, then the network **printer** is lack of its functionalities which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 2625

For claim 20, the claimed invention is directed to non-statutory subject matter, the claimed invention lacks patentable utility, the disclosed invention is inoperative and therefore lacks utility.
